

Solve each problem.

Answers

- 1) A pet store kept their hamsters in cages with 8 per cage. For their Christmas sale they put out 9 cages and end up selling all but 4 hamsters. How many hamsters did they sell during their Christmas sale?
- 2) On the home screen of Vanessa's tablet she had 10 rows of apps with 6 apps on each row. If she deleted 29 apps, how many would she have left on her home screen?
- 3) For the science fair Maria wanted to see how many minutes of videos she watched were ads. She watched 6 videos with each video lasting 10 minutes. After watching the videos she calculated that she had watched 2 minutes of ads over all the videos. How many minutes were not ads?
- 4) At the book store they were offering a deal where you get \$4 off when you purchase 9 books. If Gwen bought 9 books and each book cost \$6, how much would her final price be?
- 5) Janet bought 5 boxes of candy on sale. Since each box had 9 pieces of candy inside of it, she decide to give George 12 pieces. How many pieces of candy would Janet have left after giving George his pieces?
- 6) A chef bought 9 bags of apples for \$45. Each bag had 7 apples, but he had to throw away 14 apples because they were rotten. How many good apples did the chef end up with?
- 7) For a project, a builder purchased 9 boxes of bolts with each box containing 10 bolts. He ended up finishing the project 9 days early and with 3 bolts left over. How many bolts did he use for the project?
- 8) Jerry was selling drawings for \$3 each. For every 7 drawings he sold, he had to use \$5 in art supplies to make them. How much profit would he make if he sold 7 drawings?
