

Hey there, have you ever spotted a bird standing on one leg, colored in shades of pink and red? That's a flamingo, a beautiful bird that gets its dazzling color from eating certain types of food, like shrimp and algae. These stunning creatures have long, lean necks and equally long legs that help them wade in deep waters. Flamingos have a unique beak that's bent in the middle, which they use like a filter to catch their food in water.

Speaking of food, let's dive into a flamingo's typical menu. They love to munch on small creatures like shrimps, snails, and microscopic organisms known as plankton. These animals contain a natural pigment called carotenoids that gives flamingos their pink color. When baby flamingos are born, they are grey or white, but they start to turn pink after eating food containing carotenoids.

Now that we have our bellies full, let's take a trip to where these beautiful birds hang out. Flamingos live in parts of Africa, Asia, the Americas, and Europe, but the majority of them love to hang out in parts of Africa and South America. They love living in large groups, sometimes with thousands of other flamingos, around lakes, lagoons, and swamps. Living in large groups helps protect them from predators and increases their chances of finding a mate.

If you're wondering how we humans interact with flamingos, you're in for a treat. People around the world adore flamingos and often visit places where they live to watch their elegant movements and beautiful colors. However, humans can also pose a threat to flamingos by disturbing their natural habitats. So, while we admire these beautiful birds, it's important to remember to protect their homes so they can continue to thrive and paint our world pink with their presence.

Solve each problem.

Use the article to answer the question.

- 1) What are some foods flamingos eat?
 - A. Grass, leaves, and fruits
 - B. Fish, frogs, and insects
 - C. Nuts, seeds, and berries
 - D. Shrimps, snails, and plankton

- 2) How do flamingos get their dazzling color?
 - A. They are born with it.
 - B. By bathing in bright colored water.
 - C. By rolling in colored mud.
 - D. By eating certain types of food like shrimp and algae.

- 3) What color are baby flamingos when they are born?
 - A. Grey or white
 - B. Black or brown
 - C. Yellow or orange
 - D. pink or red

- 4) What is a threat to flamingos?
 - A. Fire in the forest
 - B. Heavy snow and ice
 - C. Humans disturbing their natural habitats
 - D. Rainstorms and floods

- 5) What is the purpose of a flamingo's long legs?
 - A. To help them wade in deep waters
 - B. To help them fly
 - C. To help them run fast
 - D. To help them climb trees

- 6) What gives flamingos their pink color?
 - A. Melanin
 - B. Keratin
 - C. Chlorophyll
 - D. Carotenoids

- 7) Where do most flamingos live?
 - A. Parts of Africa and South America
 - B. Parts of North America and Australia
 - C. Parts of Antarctica and Arctic
 - D. Parts of Asia and Europe

- 8) What kind of habitats do flamingos like?
 - A. Deserts, mountains, and forests
 - B. Cities, towns, and villages
 - C. Lakes, lagoons, and swamps
 - D. Fields, meadows, and hills

- 9) What's special about a flamingo's beak?
 - A. It is bent in the middle and they use it like a filter to catch their food in water.
 - B. It changes color to match their surroundings.
 - C. It's long and helps them reach high food sources.
 - D. It is very sharp and helps them catch fish.

- 10) Why do flamingos live in large groups?
 - A. For food
 - B. For warmth
 - C. For play
 - D. For protection from predators

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 11) "I use my beak for hunting on the ground for worms."
- 12) "I mainly inhabit places in Australia."
- 13) "My menu includes small creatures like shrimp or snails."
- 14) "My short legs make it difficult for me to go in water."
- 15) "My favorite place to live is in the desert."
- 16) "I like to eat fruits and vegetables."
- 17) "When I was a baby, I was grey."
- 18) "Living in large groups helps me increase my chances of finding a mate."
- 19) "My unique beak is bent in the middle and I use it like a filter to catch my food in water."
- 20) "I enjoy being solitary and independent."
- 21) "I am born with a beautiful pink color."
- 22) "I prefer to live alone."
- 23) "I get my pink color from eating food containing carotenoids."
- 24) "I like to live in small groups of less than 20."
- 25) "We grow up together in huge groups. There are sometimes thousands of us in one place."
- 26) "I love living near water. Lakes, lagoons, and swamps are where I call home."
- 27) "I can be found all over the world, from Africa to Europe."
- 28) "I prefer to live in icy cold regions."
- 29) "The secret behind my pink color is the food I eat."
- 30) "We usually live in large groups so that we can help protect each other."

Determine if the statement is a fact or opinion based on the information in the article.

- 31) Living in large groups helps flamingos to stay safe from predators.
- 32) The long neck of a flamingo is the most interesting part of its body.
- 33) Flamingos eat small creatures like shrimp, snails, and plankton.
- 34) Flamingos look the best when they are standing on one leg.
- 35) Flamingos obtain their pink color from their diet.
- 36) Flamingos are the best birds to watch because of their graceful movements.
- 37) Flamingos can usually be found around lakes, lagoons, and swamps.
- 38) Baby flamingos are not born pink.
- 39) Flamingos are the most attractive birds because of their pink and red colors.
- 40) Flamingos have the most unique beaks among all birds.

Determine if the statement is true or false.

- 41) Living in large groups helps protect flamingos from predators.
- 42) Most flamingos live in parts of Australia and Antarctica.
- 43) Baby flamingos are not born pink.

-
- 67) What do flamingos eat?
 - 68) Flamingos always stand on one leg to keep the other one warm, it's amazing to think how different they are from us!
 - 69) Did you know that a flock of flamingos is called a "flamboyance", how unique is that!
 - 70) The fact that flamingos filter-feed on brine shrimp and blue-green algae is just fascinating!
 - 71) Flamingos have the ability to drink boiling hot water, isn't that mind-blowing!
