

Solve each problem.

1) $\frac{3}{5} - \frac{2}{7} =$

2) $\frac{2}{3} + \frac{1}{7} =$

3) $\frac{2}{3} - \frac{3}{5} =$

4) $\frac{7}{8} + \frac{3}{5} =$

5) $\frac{8}{10} - \frac{3}{4} =$

6) $\frac{4}{6} + \frac{3}{10} =$

7) $\frac{4}{5} - \frac{4}{6} =$

8) $\frac{1}{2} + \frac{1}{6} =$

9) $\frac{7}{8} - \frac{2}{5} =$

10) $\frac{8}{9} + \frac{1}{6} =$

Answers

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Solve each problem.

1) $\frac{3}{5} - \frac{2}{7} = \frac{21}{35} - \frac{10}{35} = \frac{11}{35}$

2) $\frac{2}{3} + \frac{1}{7} = \frac{14}{21} + \frac{3}{21} = \frac{17}{21}$

3) $\frac{2}{3} - \frac{3}{5} = \frac{10}{15} - \frac{9}{15} = \frac{1}{15}$

4) $\frac{7}{8} + \frac{3}{5} = \frac{35}{40} + \frac{24}{40} = 1\frac{19}{40}$

5) $\frac{8}{10} - \frac{3}{4} = \frac{16}{20} - \frac{15}{20} = \frac{1}{20}$

6) $\frac{4}{6} + \frac{3}{10} = \frac{20}{30} + \frac{9}{30} = \frac{29}{30}$

7) $\frac{4}{5} - \frac{4}{6} = \frac{24}{30} - \frac{20}{30} = \frac{4}{30}$

8) $\frac{1}{2} + \frac{1}{6} = \frac{3}{6} + \frac{1}{6} = \frac{4}{6}$

9) $\frac{7}{8} - \frac{2}{5} = \frac{35}{40} - \frac{16}{40} = \frac{19}{40}$

10) $\frac{8}{9} + \frac{1}{6} = \frac{16}{18} + \frac{3}{18} = 1\frac{1}{18}$

Answers

1. $\frac{11}{35}$

2. $\frac{17}{21}$

3. $\frac{1}{15}$

4. $1\frac{19}{40}$

5. $\frac{1}{20}$

6. $\frac{29}{30}$

7. $\frac{4}{30}$

8. $\frac{4}{6}$

9. $\frac{19}{40}$

10. $1\frac{1}{18}$
