Two Step Problems

Name:

Solve each problem.

1) At the fair Will bought sixteen tickets. After riding the ferris wheel he had seven tickets left. If each ticket cost three dollars, how much money did Will spend riding the ferris wheel?

1. _____

2. _____

2) John had nine action figures, but needed sixteen total for a complete collection. If each one costs $4, how much money would he need to finish his collection?

3. _____

4. _____

3) A worksheet had eight problems on it. If a teacher had five worksheets to grade and had already graded two of them, how many more problems does she have to grade?

5. _____

6. _____

4) Paige earned nine points for each bag of cans she recycled. If she had twelve bags, but didn't recycle seven of them, how many points would she have earned?

7. _____

8. _____

5) A new building needed four windows. The builder had already installed two of them. If it takes six hours to install each window, how long will it take him to install the rest?

9. _____

10. _____

6) A magician was selling magic card decks for two dollars each. If he started with twelve decks and by the end of the day he had nine left, how much money did he earn?

7) There were nine friends playing a video game online when five players quit. If each player left had six lives, how many lives did they have total?

8) George invited five friends to a birthday party, but three couldn't come. If he wanted to buy enough cupcakes so each person could have exactly seven, how many should he buy?

9) Edward earned five dollars for each lawn he mowed. If he had eight lawns to mow, but forgot to mow two of them, how much money did he actually earn?

10) A chef needs eight potatoes for a meal. He has already cooked four. If each potato takes seven minutes to cook, how long will it take him to cook the rest?
