

Use subtraction to solve each problem.

Answers

- 1) Over the summer Cody earned 1,302 dollars doing lawn care (mowing, weed eating and weed spraying). If he earned 439 dollars weed eating and 664 dollars mowing lawns, how much money did he earn with his weed spraying?
- 2) Kaleb's class was trying to collect 1,632 cans total. In the first month they collected 529 cans and in the next month they collected 805. How many more cans do they need to collect?
- 3) A store sold mushroom, chicken and tomato soup. If they had 1,454 cans total, with 505 cans of mushroom soup and 383 cans of tomato soup, how many cans of chicken soup did they have?
- 4) Together three friends collected 1,751 cans for recycling. If the first friend picked up 898 cans and the third friend picked up 708 cans, how many cans did the second friend pick up?
- 5) A large gumball machine had 3 flavors of gumball in it, with 913 gumballs total. If 437 were cherry flavored and 201 were banana flavored, how many were apple flavored?
- 6) Tiffany was uploading photos to Facebook. She uploaded 983 pics into 3 different albums. If she put 310 pics in the first album and 275 in the second album, how many pictures did she put in the third album?
- 7) A school had chocolate, regular and strawberry milk. If the cafeteria had 1,378 cartons total, with 452 chocolate milk cartons and 215 regular milk cartons, how many cartons of strawberry did they have?
- 8) In a trivia game there are 1,712 points that can be earned. If Team A scored 116 points and Team B scored 717 points, how many points did Team C score?
- 9) Debby could send 1,903 text messages in a month. If she sent 578 messages the first week and 706 the second week, how many text messages can she still send?
- 10) Tom collected 3 rocks from his garden. All together they weighed 1,495 grams. If the first rock weighed 757 grams and the third rock was 226 grams, how much did the second rock weigh?
